

AIRDIT Intelligent Data Governance (AIDG)

"Empowering Data Integrity with
Advanced Governance Solution"

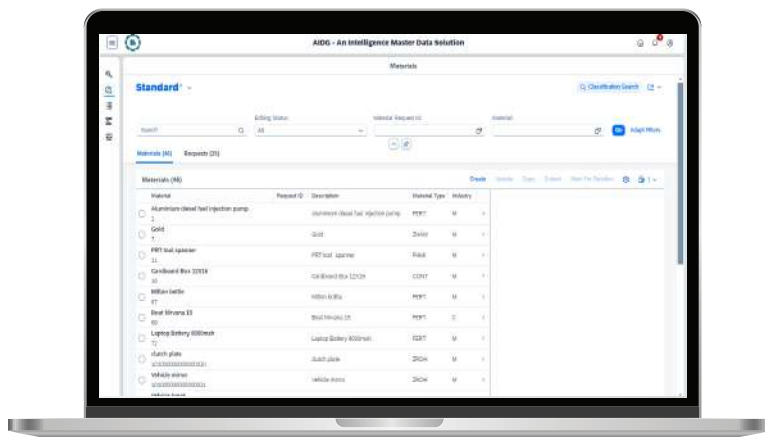

Overview

Master Data Governance Add-On for SAP Customer

AIRDIT Intelligent Data Governance (AIDG) is an **advanced data governance solution** designed to **optimize the management of Master Data** in **SAP S4HANA**. It features **duplication checks using fuzzy logic**, **configurable workflows for approvals and rejections**, and **comprehensive coverage** of master data types such as **Material Master**, **Business Partner**, and more. AIDG supports **customizable templates**, **mass operations for data creation and editing**, and future **NLP-powered data and analytics on demand**. It ensures **efficient data management** through a **streamlined process of initiation, approval, and real-time system updates**, notifications making it an **essential tool for maintaining accurate and reliable data**.
